EXAMINER

MILLER, SAMANTHA A

ART UNIT

PAPER NUMBER

3749

MAIL DATE

DELIVERY MODE

05/29/2009

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/578,564	Applicant(s) KOMOWSKI, MICHAEL	
	Examiner SAMANTHA A. MILLER	Art Unit 3749	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 March 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4,6 and 10-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4, 6, 10-21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

Receipt of applicant's amendment filed on 3/17/2009 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, and 10-12 rejected under 35 U.S.C. 102(b) as being anticipated by PIERRE (FR 2,771,966).

1. A circumferential surface (Fig.4) of a part-cylinder, wherein the circumferential surface forms a first region (three surfaces 50, Fig.4), two circle segment surfaces (48 on each side) forming lateral side surfaces of the part-cylinder, wherein each circle segment surface forms a second region (48), an externally surrounding rim (64), which is arranged substantially in two planes (Fig.4), projects outward and serves to bear against correspondingly designed beating surfaces, at least a second rim (around the top and side edges of 48) running along the circumferential surface, the circle segment surfaces, or a combination thereof, and at least one opening (58 and 52) in at least one segment of the first region, one or both of the second regions, or a combination thereof, wherein the at least one segment is delimited by the externally surrounding rim and the second rim (Fig.4).

2. The second rim is provided in the first region of the drum flap (being between the first and second region).

3. The second rim is provided in the second region (being between the first and second region).

4. The second rim is arranged in a plane in which a pivot axis (from 51) also lies, and projects outward, wherein the plane in which the second rim lies is arranged in an angle between the two planes (90 degree angle) in which the externally surrounding rim is arranged.

6. A circular region having a thickness designed to match the externally surrounding and second rims, is provided in a region of a pivot axis (Fig.4).

10. Two outwardly protruding bearing journals (51) are provided on a pivot axis.

11. An air guidance housing (Fig.3), and a drum flap (40) arranged in the air guidance housing, wherein the drum flap comprises: a circumferential surface of a part-cylinder, wherein the circumferential surface forms a first region (three surfaces 50, Fig.4), two circle segment surfaces forming lateral side surfaces of the part-cylinder, wherein each circle segment surface forms a second region (48 on each side, Fig.4), an externally surrounding rim (64), which is arranged substantially in two planes, projects outward and serves to bear against correspondingly designed bearing surfaces (Fig.4), at least a second rim (around the top and side edges of 48) running along the circumferential surface, the circle segment surfaces, or a combination thereof, and at least one opening (58, and 52) in at least one segment of the first region, one or both of

Art Unit: 3749

the second regions, or a combination thereof, wherein the at least one segment is delimited by the externally surrounding rim and the second rim.

12. The drum flap serves as an air distributor flap and/or as a temperature mixing flap (English Abstract).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over PIERRE in view of MUELLER (DE10031991).

PIERRE teaches the invention as discussed above; however PIERRE does not teach a third region or a intermediate region.

MUELLER teaches:

Regarding claims 13-21; a third region, wherein the second rim runs substantially around the third region (17), and a planar intermediate region arranged at an angle not equal to 180° from the third region (between 12 and 17), wherein the third region indirectly adjoins a lateral surface in a region of the externally surrounding rim via the intermediate region (Fig.7).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the valve of PIERRE in view of the third region of MUELLER in order to stop the rotation of the valve.

Response to Arguments

Applicant's arguments with respect to claims 1-4, 6, 10-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Samantha A. Miller whose telephone number is 571-272-9967. The examiner can normally be reached on Monday - Thursday 8:00 - 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve McAllister can be reached on 571-272-6785. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
